SKILLS

React, Redux, Javascript, HTML, CSS, SQL, Python, Flask, SQLAlchemy, Express, Sequelize

PROJECTS

FLASHSCAPE (ReactJS, Redux, Javascript, Python, Flask, SQLAlchemy)

[Live](#) | [Github](#)

Flashscape is a clone of the flashcard app "Brainscape".

- Utilized ReactRouter and Flask-Login to implement user authentication and authorization, allowing for users to only access/change resources they are permitted to.
- Built a simple modal framework using React/JS to allow for DRYer code, as well as a smooth UI/UX experience.
- Utilized normalized Redux State to allow for performant and scalable rendering and data manipulation

NOTYELP (ReactJS, Redux, Javascript, Python, Flask, SQLAlchemy)

[Live](#) | [Github](#)

NotYelp is a clone of the website "Yelp" for pizza places, made by a group of four developers.

- Employed the unidirectional state management of Redux to simplify React components and directly manage data for form inputs and form submissions.
- Utilized ReactRouter and Flask-Login to implement user authentication and authorization, allowing users to only access/change resources they are permitted to.
- Implemented custom search using redux

ABOUT

- Highly skilled and detail-oriented developer, with a strong desire to grow and improve.
- Successful in fast-paced/intense environments and quick to adapt to new technologies.
- Proven ability to maintain workflow under stress.
- Proficient at debugging/troubleshooting.
- Strong problem solver

EDUCATION

Web Development - App Academy | Fall 2022
